Play Store Lets you download and install Android apps in Google play officially and securely. It's Google's official store and portal for Android apps, games, and other content for your Android-powered phone or tablet. Google Play is the heart of the Android OS. Without it, a normal user will not be able to make their Android device work properly. Therefore in this article, we will let you know about the Google Play Store Latest Updates and the latest running version. Just as Apple has its App Store, Google has Google Play! It's a huge place and it offers a lot of content to its users. Play Store is not available on Google Play as an app to download. Play Store only deals with android apps. The whole world uses it to download applications on their smartphones, android wears, or tablets. Users can search and install their apps using this platform. Appv'n app store is a similar platform for app downloads and updates. Some apps are paid but most of the apps are free of cost here. New feature Play Protect regularly checks your apps and device for harmful activities. You will also get a notification if some security risk is found. Now with the play protect service you locate your device using the find my device app or by logging on to android.com. Updating your Play Store to the latest version: Play Store comes pre-installed on all android devices because of its importance in managing installed apps and installing new ones. But, normally for users who are either new to the Android OS or for people who haven't updated their installed versions of the Play Store you can update to the latest version of Google Play through this APK. You can start by downloading from this page if you want to get the latest version of the Google Play Store 2019 release. Also, you can search for all kinds of apps like Music, Games, Books, Videos, Photo editors, and a lot more. A single word search leads to a number of varieties of similar apps and you can install your desired app on your android phone. Moreover, it displays the current ratings of the app. So you can judge the app through the display rating and then install the app. Update your Apps via the Play Store directly: All the apps that you install on your Android Device will be managed via the play store. It will make sure that all the latest versions released by the app developers reach you. By keeping your apps up to date you enable them to work properly. App updates normally contain Bug fixes and new features that will make your app experience much better. Note: Google Play Store won't work until you have Google Play Services installed on your device. Google Play Store - Everything For Your Android Devices It is no overestimation to say that Google Play Store is the heart of the Android operating system. Normally, your Android devices will have Google Play Store by default. However, if for any reasons, the app is missing on your smartphone or tablet, do not worry! You have the Google Play Store APK at your fingertips. Below is the detailed review of this wonderful application. Check it out! The History Of Google Play Store Do you know that in the past, Android users had to visit different platforms to get their desired content. The release of Google Play Store in 2012 was an outstanding move as it combined three major stores (Android Market, Google Music, and Google eBookstore) into one. At the beginning, the store offered about 450,000 apps and games for users to download. That figure increased significantly to reach millions over seven years. Over time, the app has undergone plenty of changes in interface and design, all of which was to maximize user experience. It is an interesting fact that Google Play Store generates the highest amount of revenue besides the Internet ad business. What The Google Play Store APK Got To Offer Let me assure you that the Google Play Store APK works exactly like the normal Google Play Store. And if you do not know what is inside the app, here we go! Applications The Google Play Store offers access to a variety of content, including applications, books, music, films, and TV programs. Hit the download button and you can install any app you want onto the device. Most of the apps are free of charge, but you need to pay a small amount of money to get some. Do note that some paid applications are available to specific countries only. If you are into an application, tap on it to see ratings and comment from previous users. I truly appreciate this feature as I can learn a lot in the comment section. Interface There is a search bar on the top of the homepage, which allows users to search for content by name or keywords provided by the app provider. Down below are lists of top apps in different categories. For example, "Top Grossing" features applications that have the highest amount of revenue. Meanwhile, "Trending Apps" list out the ones with increasing number of installation recently. You can also judge the popularity of the apps by how many times the app has been downloaded. The download count is a badge with colors, which is based on the milestones the app has passed. For example, the badge will be grey if the app has 100, 500, 1,000 and 5,000 downloads. Updates Google Play Store provides frequent updates of application to add new features and fix bugs. It makes sure you have the best experience using these applications. Security Play Store will check your app regularly to detect harmful activities to the device. If there is any security risk found, it will immediately send a notification to let you know. By that way, you can enjoy your application without worries. How To Install The Google Play Store APK After downloading the APK file, let's come to the next part of installing the app onto your device. Tap on the "File Manager" to open the app. Find the APK you have downloaded and select it. A warning should pop up saying the installation is blocked as it does not form a part of Google Play Store. Tap on "Settings" then. At the Settings, choose the option of "Allow install of non-Play Store applications", then tap on "OK". This way, you have permitted the installation of applications that do not belong to Google Play Store. Return to where your APK file is and tap on it. A box should pop up asking if you want to install the application onto your device. Tap on "Next" and then "Install". There will be a message notifying that the application has been successfully installed on your device. Above is how you can install the Google Play Store APK. After that, you can start downloading apps on the platform as usual. How To Check Your Current Google Play Version Not only those without Google Play Store by default, but others who want to update or revert your current version can download the APK files too. In case you have no idea which version of Play Store you are using, scroll down for the steps. Go to Settings and tap on Apps & Notifications Tap on "See all apps" and scroll to find Google Play Tap on "Advanced" and scroll to the bottom to find the version number To Wrap Up You see, the Google Play Store is too good to be true. Do not hesitate anymore! Click here and download the app to enjoy a myriad of applications and games right away. And if you have already tried out this wonderful app, comment your experience below to let us know. If you find this review helpful, please like and share with your friends or anyone struggling without Google Play Store you know. Thanks for reading! You will be automatically redirected to the homepage in 30 seconds. The Google Play Store app is Google's official source for Android apps and downloads. It provides millions of apps to billions of users worldwide and it is fully featured to give a great experience. contents About Google Play Store Key features Use Installation on PC Cost Security What is Google Play Store? Google Play Store, also known as Google Play, is a digital distribution service where you can download free and paid digital content, including apps, games, books, etc. Created by Google and offering a pretty smooth experience, it is used to download all the other apps on your device and manage app purchases and refunds. What are the key features of Google Play Store? Modern interface: It offers an intuitive, stylish, and nice-looking interface that makes it very easy to navigate the different menus of the store and find whatever you are looking for in seconds and a few clicks. It even features a dark mode to make your eyes feel more comfortable throughout the experience. Centralized hub: This is where you want to go if you are looking for an app on your device, as it manages millions of apps, including games, apps, books, and movies & TV. Besides, there are billions of active users each month, over 140 billion downloads every year, and it is available in over 190 countries. © Google Easy payments: Google Play Store supports many convenient payment types, including credit or debit cards, Google Play Balance, Mobile phone billing, Google Play gift cards, and PayPal. The whole payment process is always accessible and is done in seconds. Google Play Pass: Google Play Pass is an excellent subscription service that offers you access to hundreds of apps and games completely free of ads and in-app purchases and provides a high-quality collection of titles. Moreover, you can share it with other family members so that everyone can enjoy it on their own. Google Play Points: Google Play Points is a program rewarding users for engaging with the Play ecosystem. You can earn points by purchasing apps or in-app content and trying free apps and games. You can later redeem points for particular items offered by developers or Google Play Credit to buy or rent products like movies, audiobooks, etc. It is excellent as both the users and the developers are rewarded. © Google Kids friendly: You will find plenty of apps, games, and more that are approved and suitable for kids so that your little ones can take advantage of what's good for them. Developer friendly: The platform makes it easy for developers to distribute their games and apps to billions of users worldwide. They also provide tools and free training to help developers manage app releases, performance, and account and payment management to make sure you are used to the platform. Once Google Play Store is downloaded, installed, and launched, you can log in with your account. Then, you just have to type the names of the apps you want in the search bar and find what fits your needs. You can also navigate across the different sections, depending on whether you are looking for apps, games, books, etc. How to install Google Play Store on your PC? Download the ZIP file we provide you at the top of this page, unzip it and run the BlueStacksInstaller.exe file to install this emulator on your PC. Now, in BlueStacks, click on Play Store. Sign in with a Gmail account Once the Google Play Store app is launched, click on the Sign in button. Enter your Google email address and follow the connection process. You are now good to go. Sign in with a non-Gmail account First, go to Google.com and click on the Sign in button at the top-right side of the screen (If you are already signed in, log out first and then click on the Sign in button). Then, click on Create account, choose the option that suits you (either For myself or To manage my business), and click Next. On the sign-up form, fill in your first name, and last name, and click on Use my current email address instead. Fill in your non-Google email address in the Your email address field. Finish the account creation process by choosing a password and confirming your email address with the verification code Google will send you. Go back to BlueStacks and sign in using this email address. You are now good to go. Is it free? Yes, Google Play Store is 100% free to download and use. Is it safe? Yes, Google Play Store is a safe app where the content is checked to ensure you don't take risks. It will warn you about detected apps that violate the Google Play Store unwanted software policy. In addition, it sends you privacy alerts about apps that can get user permissions to access your personal information, violating the Developer Policy.
